ANKIT YADAV

Senior Java Full Stack Developer | Technical Lead

ankit151software@gmail.com | +91 9450337307 | Noida, India

PROFESSIONAL SUMMARY

Senior Java Full Stack Developer / Technical Lead with 8+ years of Java experience and 5+ years of JavaScript/TypeScript experience building enterprise applications and SaaS platforms. Hands-on with Java, Spring Boot, REST APIs, Hibernate/JPA, Angular, TypeScript, and relational databases. Experienced in microservices, secure API development, large-volume data processing, performance troubleshooting, CI/CD, Kubernetes, and production observability. Has independently made solution and architecture decisions and worked with teams to evaluate trade-offs and deliver enterprise systems.

CORE TECHNICAL SKILLS

Programming: Java (8+ years), JavaScript/TypeScript (5+ years), Core Java, Java 8+

Backend & APIs: Spring Boot, Spring MVC, Spring Security, Hibernate, JPA, RESTful Web Services, Microservices

Frontend: Angular, TypeScript, JavaScript, jQuery, HTML5, CSS3

Databases & Data: PostgreSQL, Oracle, Microsoft SQL Server, MySQL, MongoDB, SQL optimization, pagination, stored procedures

Cloud & DevOps: Microsoft Azure, Azure DevOps, Azure CI/CD Pipelines, Docker, Kubernetes, Jenkins, GitHub, Maven

Security & Quality: OAuth 2.0, JWT, Swagger/OpenAPI, JUnit, SonarQube, SonarLint, design patterns

Monitoring: Splunk, Datadog

PROFESSIONAL EXPERIENCE

HCL Technologies India Pvt. Ltd. | Java Full Stack Developer

August 2023 – Present

Project: UKG Workforce Dimensions – enterprise workforce management and timekeeping platform

- Develop and enhance REST APIs and Angular UI features using Java, Spring Boot, Hibernate/JPA, JavaScript, and TypeScript.
- Work with engineering colleagues on solution design, API contracts, implementation choices, and technical trade-offs for workforce-management workflows.
- Optimize high-volume data workflows across PostgreSQL, supporting processing of large datasets and millions of records.
- Troubleshoot data-access and performance issues; use pagination-based processing patterns to reduce memory pressure when handling large result sets.
- Implement JWT-based API security and maintain interactive API documentation using Swagger UI.
- Support Jenkins build jobs and Kubernetes-based deployments; troubleshoot CI/CD pipeline and environment issues.
- Use Splunk and Datadog to investigate production logs, monitor application health, and support incident resolution.

Apar Technologies Pvt. Ltd. | Tech Lead / Senior Developer

July 2020 – August 2023

Projects: Wheebox (proctored online assessment), KoeScore, eQuaze, and eAMS (attendance management)

- Independently drove solution and architecture decisions for assigned application modules, including technical approach, component design, and implementation choices.
- Designed application workflows and database solutions, including database triggers and stored procedures across Microsoft SQL Server and Oracle.
- Led developers through technical implementation, code quality practices, and delivery of enterprise application features.
- Implemented identity and access capabilities using OAuth 2.0 and Azure Face API for face-recognition and geolocation-related workflows.
- Built scheduled background processing and bulk-upload utilities to support data-intensive business workflows.
- Maintained code quality through SonarQube quality gates and automated JUnit testing practices.

Vedasya Tech Solutions Pvt. Ltd. | Java Full Stack Developer

May 2019 – July 2020

Project: VedaJunction – SaaS homeschooling platform

- Designed and developed functional modules for exam evaluation and online exam proctoring.
- Delivered full-stack workflows using Java, Struts, JSP, Servlets, JavaScript, and MySQL.

AMA Herbal | Developer – MIS

November 2018 – April 2019

- Developed administrative registration and logging modules using Java web technologies.
- Built dynamic reporting capabilities to support operational business intelligence.

EDUCATION

B.Tech, Computer Science | Krishna Institute of Technology, Kanpur | 2016 | 65.24%

CERTIFICATIONS & ACHIEVEMENTS

- Microsoft Azure Cloud Developer Training Program – HCLTech | January 2026
- Rising Star of the Year – Apar Technologies | 2020
- Participated in the Guinness World Record event organized at Techkriti, IIT Kanpur
