ANKIT YADAV

Senior Java Full Stack Developer / Technical Lead

ankit151software@gmail.com | +91 9450337307 | Noida, India

PROFESSIONAL SUMMARY

Result-driven Java Full Stack Developer with 8 years of experience designing, developing, and deploying enterprise-grade SaaS products and web architectures. Proven track record in orchestrating microservices with Spring Boot, building interactive frontends with Angular, and managing secure cloud infrastructure with Azure DevOps and Kubernetes. Demonstrated ability to lead technical teams, optimize large-scale data systems handling millions of records, and implement robust CI/CD and observability pipelines.

TECHNICAL SKILLS

Backend Architecture: Java (Core, Servlet, JSP), Spring Boot, Spring MVC, Struts, Hibernate, JPA, RESTful Web Services.

Frontend Technologies: Angular, JavaScript, jQuery, HTML5, CSS3.

Database Management: PostgreSQL, MSSQL, MySQL, Oracle, MongoDB.

Cloud & DevOps: Azure DevOps, Azure CI/CD Pipelines, GitHub, Kubernetes (K8s), Jenkins, Maven.

Security & Identity: OAuth 2.0, JWT Authentication.

Monitoring & Observability: Splunk, DataDog, SonarQube, SonarLint.

System Design & Tools: Swagger UI, Design Patterns, Data Structures & Algorithms, Unit Testing (JUnit), Feature Toggles.

PROFESSIONAL EXPERIENCE

HCL Technologies India Pvt. Ltd. | *Java Full Stack Developer* August 2023 – Present

Project: UKG Workforce Dimensions (Next-gen workforce management & timekeeping solutions).

- Architected and delivered low-latency RESTful APIs and UI layers using Spring Boot, Hibernate, and Angular.
- Optimized data processing workflows to handle millions of records seamlessly across PostgreSQL systems.
- Integrated JWT-based authentication and automated interactive API documentation via Swagger UI.
- Configured and managed Jenkins and Kubernetes automated build jobs for environment setups and pipeline debugging.
- Utilized Splunk and DataDog to proactively debug production logs and optimize system health.

Apar Technologies Pvt. Ltd. | *Tech Lead / Senior Developer* July 2020 – August 2023

Projects: Wheebox (Proctored Online Assessment), KoeScore, eQuaze, and eAMS (Attendance Management).

- Led developers through system architecture design, database triggers, and stored procedures in MSSQL/Oracle environments.
- Implemented enterprise identity security using OAuth 2.0 and Azure Face API for geolocation-tracked face-recognition metrics.
- Engineered automated background processing via cron jobs and bulk uploading utilities for dynamic data pipelines.
- Maintained 90%+ code quality bars by enforcing SonarQube scans and automated JUnit testing criteria.

Vedasya Tech Solutions Pvt. Ltd. | *Java Full Stack Developer* May 2019 – July 2020

Project: VedaJunction (SaaS Homeschooling Platform).

- Designed core functional modules focusing on exam evaluation and exam proctoring features.
- Developed full-stack workflows using Java, Struts, JSP, Servlets, and MySQL.

AMA Herbal | *Developer – MIS* November 2018 – April 2019

- Built administrative registration and logging modules using early-tier Java web frameworks.
- Generated dynamic report frameworks for operational business intelligence.

EDUCATION

B.Tech in Computer Science 2016

Krishna Institute of Technology, Kanpur — Score: 65.24%

KEY CERTIFICATIONS & MILESTONES

- Certified Cloud Developer: Microsoft Azure Cloud Developer Training Program – HCLTech (Jan 2026)
- Award Winner: Rising Star of the Year (2020) – Apar Technologies
- Global Recognition: Participated in Guinness World Record organized at Techkriti, IIT Kanpur
